Why Self-Fund Dental?

COST SAVINGS FOR EVERYONE

- The average family spends <\$500 per year on dental benefits. But dental insurance premiums for families are \$80 per month or more (\$960+ annually). Why leave an extra \$460 or more per family/year with an insurance company? Instead, self-fund your members' dental expenses up to a set annual limit.
- That's a cost saving of 35% or more for employers.
- Employees will receive PPO discounts of 25% or more on dental fees. Plus, large PPO networks equal lower out-of-pocket expenses!

WE MAKE IT SIMPLE!

- You choose how much you want to spend annually on your members' dental expenses.
- You choose which services are covered (we offer prepackaged or custom plan designs).
- We handle the administration for a low, per employee, per month fee!

WHO IS E.D.I.S.?

- Also known as Employer Driven Insurance Services, E.D.I.S., is a Third Party Administrator. We will manage your self-funded plan so it operates like the fully-insured dental plan employers and employees are used to.
- Setup requires minimal paperwork with friendly and professional customer service.
- Claims are paid daily, leading to satisfied employees and satisfied dentists.
